

KONARSKI SECONDARY SCHOOL THE PLACE AND THE PEOPLE

Our school is a brick building dating back to 1932. The three-storey construction towers over the neighboring buildings and its architectural charm is particularly appreciated when the bricks reflect the sunbeams. Conveniently located near bus stops and shops, 24 Konarski Street in Oświęcim is easily accessible to city residents as well as those who commute from neighboring towns and villages.

The school is a coeducational three-year college preparatory attended by approximately 800 pupils from 16 to 18 years of age. They choose this school because of its high teaching standards, state-of-the-art equipment and wide range of facilities including a large gymnasium, library, science laboratories and computer science study rooms. Above all the friendly atmosphere and dedicated staff punctuate the school day with the encouragement youngsters need to keep striving for success and courageously face new challenges.
